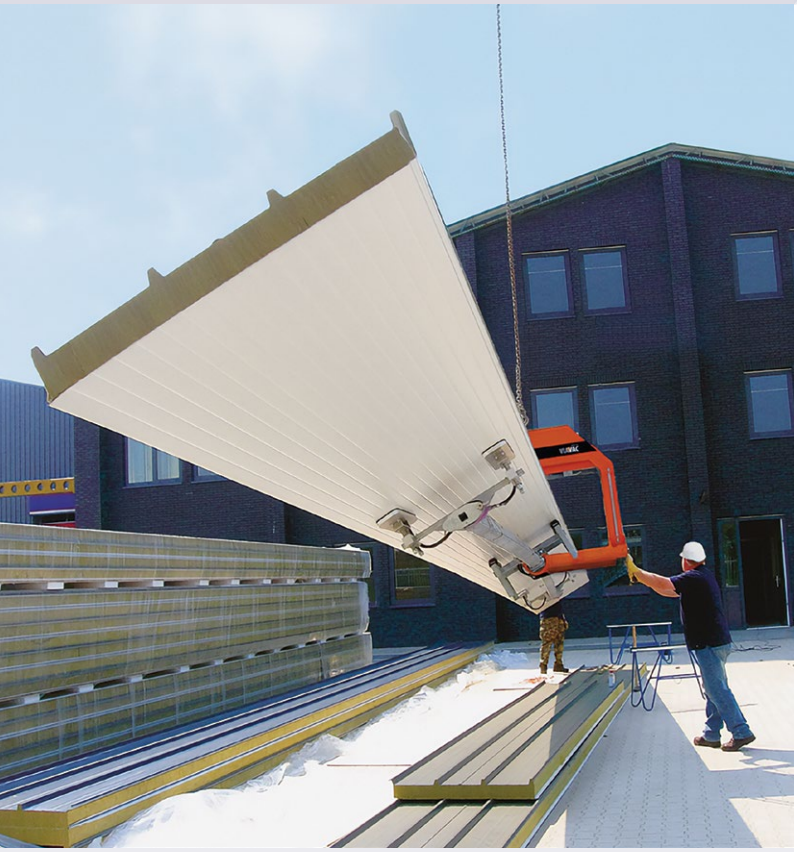
VACUUM PANEL LIFTER ////

Rota Boy

4Cladding Services



DESCRIPTION

Rota Boy is the world's first composite panel lifting unit of its kind. Developed in conjunction with Kingspan, a global leader in high-quality building materials, Rota Boy was the first combined panel lifting and turning unit.

Suitable for all types of interleaved composite roof panels, this unique panel-turning unit machine solves the health and safety issues associated with panel rotation without the risk of panel damage.

The Rota Boy is a unique machine capable of lifting and turning roof panels up to 18m long and 350 kg weight.

SAFETY FEATURES

- Audible low vacuum warning
- Large vacuum buffer tank
- Secondary safety straps

SPECIFICATIONS

Lift & turn capacity	350 kg
Machine weight	500 kg
Maximum panel length	18.5 m
Vacuum circuit(s)	Single-circuit
