

The Glass Boy® range is constantly expanding and now includes a unique blend of new innovative and well established industry standard vacuum lifters covering a wide spectrum of glazing and façade installation projects.

We are committed to delivering excellent products, unrivalled service and competitive hire rates with daily, weekly and contract rates available.

GLASS BOY® 111

The original unit offering powerful lifting in a compact and easy to transport form. Weighing less than 50Kg, the 111 is suitable for glass elements weighing up to 500Kg with full tilt and rotation around a single central suction pad. With its own carry frame and transport wheels, this machine will fit in the boot of a car!

Weekly hire - 111 unit £125/week

Daily hire - 111 unit £65/day

GLASS BOY® 141

The 141 is a true work horse of the glazing industry and we now offer the latest version with dual vacuum technology for improved load security. Compact, lightweight and economical, the 141 offers the usual tilt and 90° rotation movement with a lift capacity of 320Kg

Weekly hire - 141 unit £150/week

Daily hire - 141 unit £75/day

GLASS BOY® 211

Developed from the original 111 lifter, the Glass Boy® 211 features the latest dual vacuum technology to alleviate the need for secondary safety straps. Featuring a single central suction pad with full tilt and rotation function, this machine has a lift capacity of 320Kg. The 211 can also be used on a variety of non-porous building materials.

Weekly hire - 211 unit £200/week

Daily hire - 211 unit £95/day

All machines are subject to delivery and collection charges.

Standard 2 to 3 day economy delivery is charged at £75 each way for mainland UK.

Express next day delivery is charged at £100 each way for mainland UK.

Optional site training is available for a flat fee of £100.

A full range of lifting accessories are also available on enquiry.

GLASS BOY® 411

With a lifting capacity of 320Kg through 4 suction pads, the 411 can be configured to suit a variety of pane shapes and sizes. With dual vacuum technology, full tilt and rotation movement and the option of extended arms, the 411 is a true industry standard.

Weekly hire - 411 unit £225/week

Daily hire - 411 unit £115/day

GLASS BOY® 611

The 611 utilises 6 suction pads to give a 500Kg capacity and a variety of configurations. Featuring dual vacuum technology, full tilt and rotation movement and wireless remote control load release, this lifter satisfies the most complex project requirements.

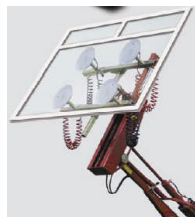

Weekly hire - 611 unit £280/week

Daily hire - 611 unit £145/day

GLASS BOY® 250

The 250 is a full function glazing robot capable of going through doorways and providing precise positioning. Featuring dual vacuum technology, this machine has a lift capacity of 250Kg and features hydraulic powered operation for ease of use.

Weekly hire - 250 unit £500/week

Daily hire - 250 unit £265/day

All rates are subject to VAT and are valid from 1st October 2008 until further notice.

Full hire terms and conditions are available on application.

All payments are strictly to our 30-day terms. For account and payment details, please contact 4 Cladding Services. Hire enquiries should be submitted to 4 Cladding Services to allow us to offer the appropriate machine specification and to advise on suitability of our machine for your project.

All orders must be confirmed in writing and must be accompanied by an official order number.

We also offer a full maintenance, repair and re-certification service for all vacuum lifting units. This includes uplift from your premises or site, free condition assessment and highly competitive service and repair rates. Re-certification is also included, complying with L.O.L.E.R. regulations.
