

Crane C-Hook Overhang Lifter

DESCRIPTION

Installing insulated roof and wall panels beneath overhangs, eaves, balconies, canopies and other restricted areas can be challenging using standard lifting methods.

The Crane C-Hook is designed to extend the reach of compatible vacuum lifting equipment, allowing panels to be lifted and positioned beneath projecting structures and in areas with limited access.

FEATURES

- Ideal for installing panels beneath overhangs, eaves, balconies and canopies
- Increases access in restricted installation areas
- Compatible with vacuum lifting equipment
- Reduces manual handling requirements
- Helps improve site safety and installation efficiency
- Available for both hire and purchase throughout the UK

SPECIFICATIONS

Working Load Limit (kg)	1000
Depth (mm)	1000
Depth with Vacuum Lifter (mm)	935
Internal C-Hook Length (mm)	2000
